Title: Cab Sharing with people from same locality travelling to the same destination.

Description: A platform to share the cab with other users in the same locality looking for cab in the same time and travelling to the same destination. This takes multiple bookings and finds the shortest path to pick up all the users and split the fare among the users.

Platform/Environment: Python, Django framework, MongoDB, Android Client (Mobile)

Programming Languages:

Language	Mohammad	Praveen	Nachiket
Android/Java	Intermediate	Intermediate	Beginner
Python	Pro	Intermediate	Intermediate
MongoDb	Intermediate	Beginner	Beginner

Functionality:

- User can sign up
- User can Login & Logoff
- User can book or cancel cab
- User can add details of travel - Start Time, NoOfPeople
- Driver can login and log out
- User can rate and review his Driver
